<sup>&</sup>lt;sup>2</sup>In the main text the unusual occurring environment of O-A-qīng<sub>1</sub> 清 has been pointed out. Nevertheless, this anomaly can be resolved in the following manner: to split it according to the normal distribution patterns so that after the correction there will be O-III-qīng<sub>1</sub> 清 (jeng, jek) occurring after P, TR, L, TS, TSY, K and O-A-qīng<sub>1</sub> 清 (jieng, jiek) after P and K. Similarly C-A-qīng<sub>1</sub> 清 can be split into C-A-qīng<sub>1</sub> 清 (jwieng, jwiek) after K and C-III-qīng<sub>1</sub> 清 (jweng, jwek) after K.
